

TKZ: The Fashion Digital Currency of The Future

A User & Investor Friendly Whitepaper

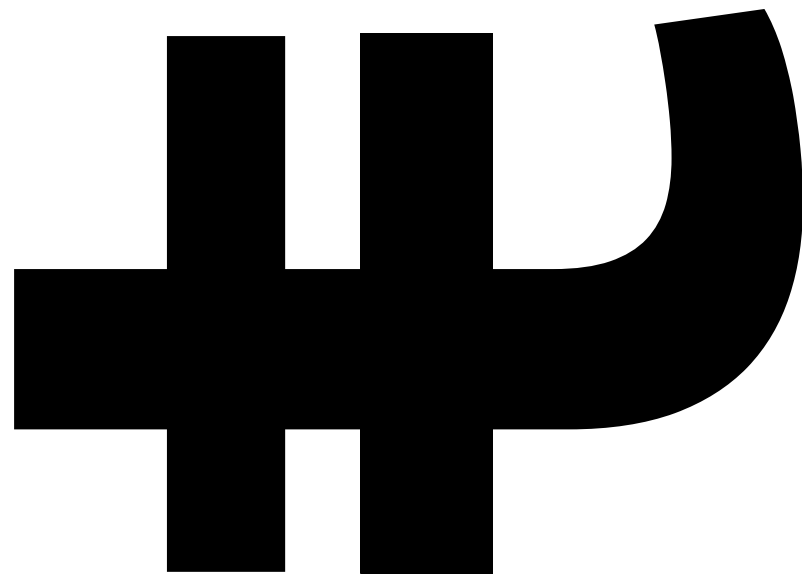

Introduction

TKZ is the official digital currency of tokenwear, designed to merge fashion, technology, and real-world utility.

Unlike traditional cryptocurrencies mined from hardware and electricity, TKZ is minted through fashion, specifically through tokenwear fashion designs that contain unique digital blockchain minting functions.

Currency Symbol

TKZ = \$0.10 **USD**

About This WhitePaper

A User & Investor Friendly Whitepaper

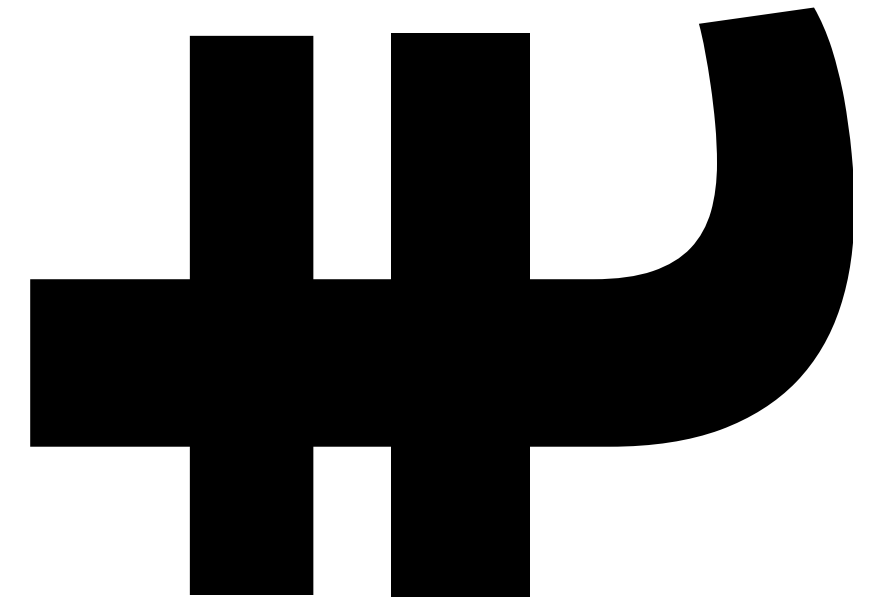

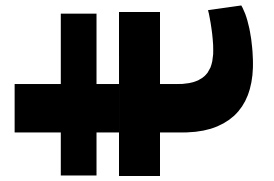

TABLE OF CONTENT:

- 01- What Makes TKZ Different
- 02- Currency Overview
- 03- Minting TKZ [How to Earn]
- 08- Environmental Impact
- 10- Purchase TKZ

This whitepaper introduces the TKZ token model, minting mechanics, ecosystem utilities, and long-term sustainability in a simple and accessible format suitable for users, merchants, and investors.

What Makes TKZ Different?

TKZ is the world's first Fashion Digital Currency

Most cryptocurrencies rely on:

Rate: 1TKZ = 0.1USD

- Hardware and GPU mining
- High energy consumption
- Complex financial speculation

TKZ instead uses:

- ✓ tokenwear fashion designs as minting devices
[Mintable tokenwear Hoodies, T-shirts, Jackets & Bags]
- ✓ tokenwear Ownership as the minting right
- ✓ Daily tokenwear scanning as the minting action
- ✓ Real world commerce as the spending layer

What Makes TKZ Different?

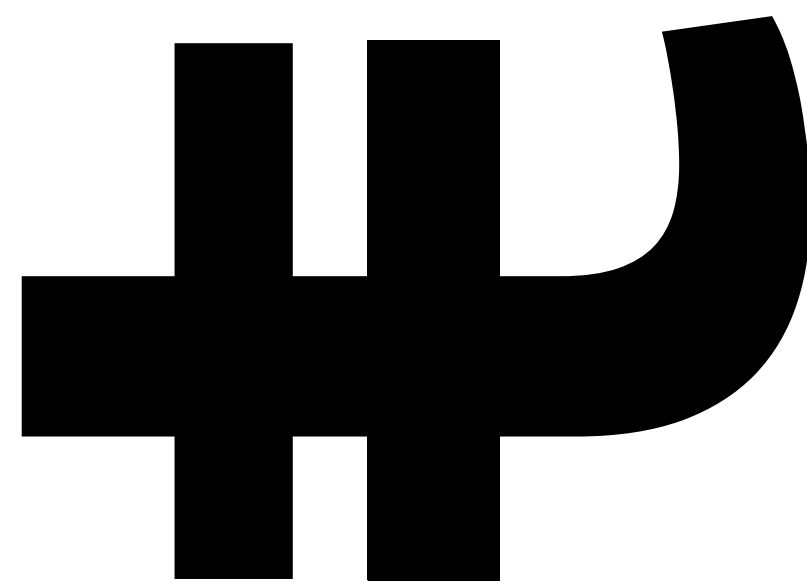

TKZ is the world's first Fashion Digital Currency

Rate: 1TKZ = 0.1USD

TKZ is a token currency that is:

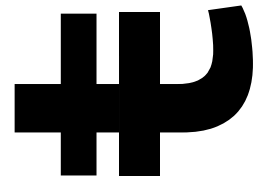

- Easy to mint
- Easy to use
- Connected directly to real-world goods and fashion
- Environmentally 🍀 sustainable

TKZ is not generated by machines, it is generated by people wearing fashion.

#1 TKZ = \$0.10 USD

Currency Overview

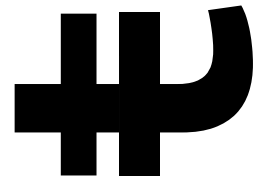

Rate: 1 **TKZ** = 0.1 **USD**

1. Peg Value

TKZ = \$0.10 **USD**

The peg ensures **TKZ** behaves like digital cash, with predictable value for users and merchants. **One TKZ equals Zero point One United States Dollars**

Currency Overview

Rate: 1TKZ = 0.1USD

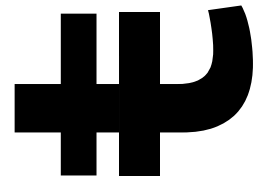

2. Purpose of TKZ

TKZ exists to power the tokenwear ecosystem:

- Minting rewards for tokenwear owners
- Spending TKZ through **tokenwear Pay** at partner merchants
- Unlocking perks, vouchers, and experiences
- Access to exclusive events and private fashion releases
- Future exchange, trading utilities, and value transfer

TKZ connects physical fashion with digital finance

Minting TKZ

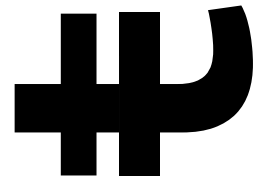

1. How Minting Works

1. Download the tokenwear Mobile App, login or signup to access your **TKZ wallet**
2. Buy a **Mintable** tokenwear design
3. Activate your ownership using the **one-time activation code** found inside your tokenwear Packaging
4. Scan your tokenwear using the tokenwear Mobile App
5. Start minting **TKZ** daily until the tokenwear's minting capacity is fully reached

Your tokenwear and the tokenwear Mobile App act as the minting devices, no servers, no rigs, no energy consumption, no technical setup needed.

Minting TKZ

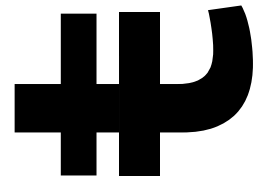

2. Why the Minting Capacity Exists

Each tokenwear design can only produce a fixed, pre-calculated amount of **TKZ**

This ensures **TKZ** stays:

1. Sustainable
2. Scarce
3. Protected against inflation

Minting TKZ

2. Minting Capacity Formula

Mining Cap = $[\text{USD Sale Price} \times 10\% \times \text{Total Quantity Produced}] \div \0.1

Example:

A **\$500** hoodie

Total quantity: **100** units

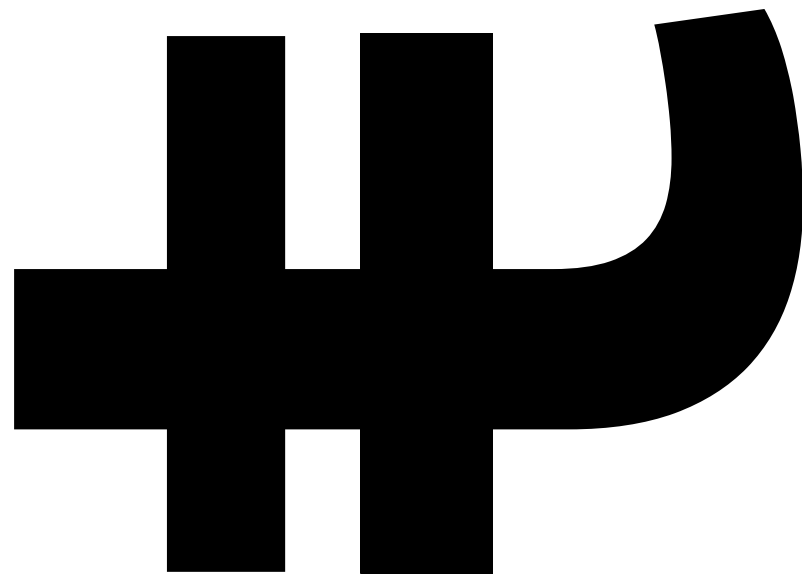

10% of price → **\$50** per hoodie

\$50 × **100** = **\$5,000** minting pool

Converted to **TKZ** → **50,000 TKZ** total capacity

Every item of the same design mints from the total mintable capacity of that particular design.

Ownership Verification & Anti-Abuse System

To prevent unlimited users from minting **TKZ** from the same tokenwear:

- ✓ Each tokenwear design contains a **one-time ownership activation QR code**
Scanning it locks the tokenwear's minting rights to the rightful owner's **TKZ wallet** on the **decentralised blockchain network**
- ✓ Minting rights are tied to the **owner's TKZ wallet**
Once activated, only the **registered TKZ wallet** can mint from that tokenwear. This prevents screenshots minting or unauthorised duplication.
- ✓ Minting rights can be transferred only when tokenwear is resold through authorized channels.
This ensures **TKZ** is earned by real customers, not exploiters.

Spending TKZ

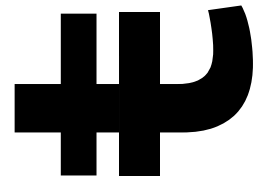

tokenwear **Pay**

TKZ is designed for real-world spending

Users can pay merchants using:

- **Scan to Pay** [customer scans merchant's QR code using tokenwear Mobile App]
- **tokenwear Scan** [merchant scans tokenwear QR code and customer enters SECRET PIN on Merchant POS]

Spending TKZ

tokenwear **Pay**

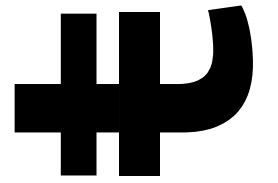

Merchants can:

- Accept **TKZ** as payment
- Use the merchant app or POS
- Redeem **TKZ for fiat**

When merchants redeem **TKZ** → **tokens are burned**

This keeps the circulating supply stable over time and reduces inflation

Spending TKZ

tokenwear **Pay**

Merchants can:

- Accept **TKZ** as payment
- Use the merchant app or POS
- Redeem **TKZ for fiat**

When merchants redeem **TKZ** → **tokens are burned**

This keeps the circulating supply stable over time and reduces inflation

Ecosystem Utilities

TKZ unlocks:

- Food vouchers
- Transport perks
- Exclusive experiences
- Event tickets
- Hidden drops
- Limited-edition access
- Partner rewards

This makes **TKZ** not just a currency, but a lifestyle utility.

Revenue Model

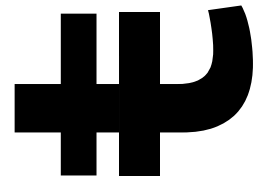

tokenwear generates revenue from:

- Garment sales
- **TKZ** top-ups [card, crypto, mobile money]
- Merchant settlement fees
- Brand collaborations
- Ecosystem partnerships
- Transaction fees [later phase]

This builds a self-sustaining economic loop.

Revenue Model

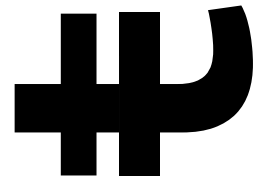

Why **TKZ** Has Long-Term Value

- ✓ Backed by real product sales
- ✓ Capped and controlled mining
- ✓ Token burn during merchant redemption
- ✓ Utility-driven demand [food, goods, experiences]
- ✓ Integrated with physical fashion

TKZ creates a measurable, predictable economic engine

Road Map

Phase 1 – Public TKZ Introduction

- Launch documentation
- Release mining garments
- Enable TKZ purchases (card + crypto)

Phase 2 – tokenwear Pay

- Merchant onboarding
- TKZ spending
- Merchant redemption + burn

Phase 3 – TKZ Exchange

- External liquidity
- Peer-to-peer transfers
- Integration with digital wallets

Phase 4 – Global Fashion Integration

- Partner brands
- Co-branded mining collections
- International merchant network

Conclusion

TKZ is the first digital currency mined through fashion.

It merges cultural creativity with real-world financial utility.

This whitepaper outlines a sustainable, user-friendly ecosystem built for long-term adoption, offering value to users, merchants, and investors through a clean economic model tied to real product sales.

*Fashion is no longer just worn.
It earns, spends, unlocks, and connects.*

Environmental 🍀 & Sustainability 🍀 Impact

- ✓ Ultra-Low Energy Minting (L2 PoS Infrastructure)
- ✓ Extends the Life Cycle of Fashion Garments
- ✓ Built-In Anti-Counterfeit System Reduces Waste
- ✓ Smarter Production Planning Through Digital Twins
- ✓ Encourages Local Merchant Circular Economies

TKZ creates a measurable, predictable economic engine
